AWARD WINNING PRODUCTS - PROFESSIONAL SERVICE GUARANTEED

Did you know?

South Australian Building Code States that:

“Glass must be free from flaws, scratches and other imperfections”

Warning: Builders could risk having to replace all the windows in a new house!

We are so confident that you will be so happy with our product we guarantee it.

But don't just take our word for it.....

Future Homes has used Protect A Window on numerous projects to protect windows against accidental damage during construction. We have found the Protect A Window service is extremely cost effective as the cost of replacing just one window can out way the cost of the product. Not to mention the time and hassle associated with replacing damaged items. By using Protect A Window we have greatly enhanced our client satisfaction thereby increasing recommendations.

Future Homes(SA) P/L.

We have found that with the increased focus on providing environmentally sustainable products, new homes are designed with more windows to enhance energy efficiency. This has seen the demand for our premium glass and frame products increase and therefore, the importance of protecting these valuable items is vital. Protect A Window provides a unique, guaranteed, high quality product that for us is the best form of protection. With the product being biodegradable, it greatly reduces the impact on the environment which is a great bonus.

Paul. Double Glazed.

Having used the Protect A Window product and service the benefits are clearly obvious. The risk of damage to the windows is greatly reduced with building materials, such as mortar and render, not coming into contact with the glass or frames. The product is easily removed upon completion with little or no cleaning required. The cost is relatively inexpensive when you consider all factors and the service is professional.

Alan Tarca. Tarca Building.

Protect A Window has been preventing accidental damage since 1992

Professionally applied by Protect A Window

Creates a durable skin or membrane that protects surfaces from scratches caused by the removal of cement render or mortar, paint splashes, grinding sparks etc.

Product is simply peeled off – leaving no residue

Suitable for use on special glass coatings such as Pilkington's Comfort Plus

Made in Australia
